

Technical Rule no. 09 rev. 01 ME

(pursuant to Article 4 of the Integrated Text of the Electricity Market Regulations, approved by decree of the Minister of Productive Activities of 19 December 2003 and subsequent amendments)

Title	Unit of measurement
--------------	----------------------------

Regulatory requirements	Article 5, para 5.1, subparas. a) and b), Integrated Text of the Electricity Market Rules
-------------------------	---

Published on

1. Foreword

Article 5, paragraph 5.1, subparas. a) and b) of the Integrated Text of the Electricity Market Rules provides that, for the purposes of the market, the units of measurement of electricity and capacity are the MWh and MW, respectively, specifying the number of decimals indicated in the Technical Rules.

2. Units of measurement

For the purposes of carrying out activities of trading in the market and of registration on the PN:

- a) the unit of measurement of the volumes of capacity offered by market Participants in the MGP, MI-A, MI-XBID, MSD, MPEG, and MTE is the MW, specified with 1 decimal;
- b) the unit of measurement of the volumes of capacity registered by Participants on the Nomination Platform (PN) is the MW, specified with 3 decimals;

The unit of measurement of electricity is the MWh, specified with 3 decimals and defined by multiplying the value of the volume of capacity in MW by the duration expressed with respect to the hour (h) of the period to which the product refers (15 minutes = $\frac{1}{4}$ h; 30 minutes = $\frac{1}{2}$ h; and 60 minutes = 1 h).
